MICHIGAN DEPARTMENT OF NATURAL RESOURCES

INTEROFFICE COMMUNICATION

July 17, 1985

TO: File

FROM: Tom Turnbull

SUBJECT: Ford Motor Company, Wixom
307 #63-01N-08E-7

Received a call from Ron Holben, MDPH, 31376, concerning subject site. He received a request from a Ford Motor Company employee to sample the water at the site. He has a concern with respect to past dumping at the site.

Spoke with Steve Cunningham, RAS and requested a copy of the file. He stated that the past activities on the site included filling in of low-lying swampy area. Material included barreled wastes, sludges, paints, etc. No other activities have been undertaken by RAS since the screening process. Steve agreed that it would be wise to let MDPH sample the wells on site to determine if they've become contaminated.

Got back with Ron Holben. He plans to test the wells for Heavy Metals and Volatile Hydrocarbons. He will forward the results to RAS and Detroit District.
